

AI and Business Analytics Expert (m/f/x)

Become a part of our prestigious research at the FH Upper Austria as a research associate.

FH OÖ Forschungs & Entwicklungs GmbH

Fakultät für Wirtschaft und Management

Your Tasks

As a research associate, your primary responsibility will be to conduct assigned research tasks in collaboration with colleagues, international research partners, and partner companies in the field of data-driven approaches for business model innovation. Your focus will be the support of our partner companies Miba AG, PÖTTINGER Landtechnik GmbH, and TIGER Coatings GmbH & Co. KG. in transitioning towards sustainable business models driven by data. This includes developing and testing various data-driven methods to enhance business operations and sustainability practices. Additionally, you will play a key role in disseminating findings and insights gained from research activities to relevant stakeholders within the company and broader community.

Your Profile

We are looking for a candidate who has completed a relevant master's degree in programs such as data sciences, artificial intelligence, mathematics, computer sciences, or statistics. The ideal applicant should possess a high interest in data-driven sustainable business model innovation for incumbent manufacturers and should thrive in working within an international interdisciplinary team. Additionally, the candidate should demonstrate highly competent skills in one of the following areas: prescriptive analytics, data mining, process mining, or artificial intelligence. Moreover, we are looking for someone with the ability and interest in combining rigorous research with relevant professional applications in an industrial environment. Fluency in both English and German is required for effective communication within our diverse team and with external stakeholders.
