

# Supply Chain Resilience – Senior Researcher / PostDoc / Assistant Professor (m/f/x)

Become a part of our prestigious research at the FH Upper Austria as a research associate.

FH OÖ Forschungs & Entwicklungs GmbH

Fakultät für Wirtschaft und Management

Logistikum

## Your Tasks

This role focuses on advancing research in the field of supply chain resilience, with an emphasis on analyzing global, dynamic, and non-linear networks to identify risks and measure resilience. It involves exploring resilience at various levels, including individual, organizational, supply chain, and (inter)national perspectives. The position requires conducting independent, high-quality fundamental research in collaboration with academic partners and contributing actively to the development of manuscripts for leading international journals. Additionally, the role includes engaging with project sponsors and working closely with the research team to ensure the successful achievement of project objectives.

## Your Profile

The ideal candidate holds a PhD in supply chain management, transportation, logistics, operations management, information systems, engineering, economics, business, or a related discipline. They demonstrate significant international exposure through publications, collaborative projects, conference participation, or guest lectures. With a proven ability to secure sponsored research, they actively foster technology transfer and entrepreneurship. The candidate has a strong track record of publishing in leading academic journals and is adept at presenting research findings and facilitating discussions in both German and English. They are driven by an ambition to advance supply chain resilience, focusing on innovative strategies to address the challenges of volatile and uncertain economic environments.
